

MNWis

The MNWis Fusion Technical Net is held Monday nights at 7:30 CST (0130 UTC Tuesday, 0030 UTC Summer time) in WiRES-X Room #21,493 and on the [MNWIS repeaters](#). The net is also available via YSF "US MNWis 21493", #37,624. The net is open to anyone interested.

Online Streaming

Note that online streaming has been discontinued. Low usage did not justify continuing it. As digital gains popularity over FM and there are more ways to connect, such as using hotspots or PDN, it was judged that the service was no longer needed.

Hotspots

Beginning March 1, 2019, the nature of operations on FCS003-23 will change. FCS003-23 will no longer be bridged to the MNWis WiRES-X room. It will become a stand-alone network for hotspot users. We encourage MNWisers to use this resource for hotspot-to-hotspot activities. It will still provide a place to hang out and users won't have to be as concerned about their conversations tying up a large number of repeaters.

The YSF bridge will continue to bridge to the WiRES-X room.
(Prior to March 1st, traffic on FCS003-23 and YSF US MNWis
21493 is bridged.)

Bridging is done using the K9EQ 444.025 repeater node #18,111.
