Yaesu Operated Fusion Rooms

For the US / North America regions Yaesu has two WiRES-X Rooms currently:

- CQ-AMERICA Room # 21000 – CQ room is Analog / Digital
- YAESU PD Room # 43369 – PDN room is only Digital

Also as a point of etiquette and a reminder to please be considerate when in a mixed mode room. These rooms could have analog and digital nodes connected. If you come into this type of room and do only digital voice the analog users will NOT hear you. In turn you will key their radios with what seems like a dead carrier.
